DETAILED ACTION

Any rejections and or objections, made in the previous Office Action, and not repeated below, are hereby withdrawn.

The terminal disclaimer filed on 12 January 2007 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of Application No. 10/503,546 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Receipt is acknowledged of the Certified English translations of the priority papers , which have been placed of record in the files.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 and 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4 and 6-9 are rejected as to being indefinite since the independent claim 1 recites that the glass composition is a multicomponent oxide glass and that at least one type of a polyvalent element is greater than 10 ppm is selected from a list, which includes Zn. The use of the term "polyvalent" in regards to the elements zinc, Zn, is improper since Zn has only a single valence state of +2. See Table from "Valences of the Elements" from the <http://chemistry.about.com/library/weekly/aa122002a.htm> web article.

The dependent claims 2-4 and 6-9 are also rejected since the limitations of the claims from which they depend are read into the dependent claims scope.

Claim 4 is rejected as to being indefinite since the claim language is unclear.

In a call to the Applicants' Representative on 2 April 2007, the Examiner suggested amendments to Claim 1 and 4, which would overcome the above 35 U.S.C. 112 rejections. However, at that time the Representative was not able to move forward without the approval of the Applicant. The suggested amendments are as follows.

In claim 1 the element "Zn" to be deleted from the listing in line 5 of the claim.

That claim 4 would be rewritten to read:

4. A glass composition according to claim 1, wherein the cations of the polyvalent element are present in an amount of 1 ppm or more.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
